

Storage:

Protect from frost/freezing.

Where to use:

Interior Walls & Ceilings - for priming and sealing dry, bare hard plaster and drywall prior to painting.

Application:

Stir thoroughly before use.

Ensure that the plaster is dry and dust free, non greasy, and clean.

Do not apply below 41°F (5°C).

Apply by brush, roller etc.

Spread so as to give an even, thin coverage.

Allow to dry thoroughly before painting.

WARNING: Older buildings may contain lead-based paint, which requires professional remediation if it is disturbed. If in doubt, consult with a professional from a Lead-Safe Certified Firm.

Drying Times:

This is highly dependent on the conditions of use, but normal drying is in the range of 1 to 4 hours (depending on the porosity of the plaster, local ventilation, and temperature).

Coverage:

Depends on the porosity of the plaster but in most applications:

260-430 Sq Ft per Gallon (single coat)

Normally only one coat is needed.

Clean Up:

Clean equipment with water.

Health & Safety:

Avoid contact with skin and eyes. Wash off splashes with water. Keep out of reach of children.
