

CONCRETE SEALER (for floors)

Overview:

An anti-dusting consolidating washable interior sealer for concrete floors: garages, workshops, industrial premises etc.

Storage:

Protect from frost/freezing.

Application:

Stir the product well before use.

Ensure that the floor is dry and dust free, non-greasy, and clean.

Do not apply in temperatures below 41°F (5°C).

Apply by brush, roller etc. Spread so as to give an even coverage.

Do not allow pooling of the product, spread out to cover thinly.

Allow to dry thoroughly before recoating.

Second coat apply as before.

Drying time is highly dependent on the conditions of use, but normal drying is in the range of 2-12 hours.

Ensure adequate ventilation to allow thorough drying

Clean equipment with warm water.

Coverage:

Depends on the porosity of the concrete but in most applications:

40-110 Sq ft per Quart (for a full two coat system)

170-430 Sq ft per Gallon (for a full two coat system)

Maintenance:

Clean with water and mild detergent. Do not use alkaline cleaners or bleach, etc.

Health & Safety:

Avoid contact with skin and eyes. Wash off splashes with water. Keep out of reach of children.
