

### **Storage:**

Protect from frost/freezing.

### **Where to use:**

This clear, colorless liquid is used on top of fillers to seal them, particularly before the use of Gloss, Satin, Feng Shui or Eggshell paint systems.

We recommend the use of a quality gypsum-based powder filler (like ECOS Filler) and, specifically, cannot recommend the use of any "Own Brand" or quick-drying fillers.

### **Preparation:**

Abrade the dry filler to a flat surface and brush/wipe free of dust.

**WARNING:** Older buildings may contain lead-based paint, which requires professional remediation if it is disturbed. If in doubt, consult with a professional from a Lead-Safe Certified Firm.

### **Application:**

Apply thinly over all areas of fillers before priming or otherwise painting, and allow to dry thoroughly before over-coating – a minimum of 3 hours.

### **Coverage:**

Over 100 Sq Ft per Quart, or over 6 Sq Ft per 2oz pot.

### **Health & Safety:**

Avoid contact with skin and eyes. Wash off splashes with water. Keep out of reach of children.
